# International Life Science Partnering Event

15 June 2006, Dundee, Scotland

<http://biodundee.ircnet.lu>  
<http://www.biodundee.co.uk>

IRC Wales

West Switzerland / France  
Rhône-Alpes - Auvergne

Are you up to date with technological innovations in your market? The IRC Partnering event at this year's BioDundee International Conference is your opportunity to meet with innovative organisations from around the globe in the Life Sciences Industry seeking to collaborate to mutual commercial benefit.

Innovation Relay Centres from across Europe have come together in collaboration with IRC Scotland and BioDundee to offer SMEs, large companies and research institutes the opportunity to (commercially) partner. Organisations from around the Globe

are invited to take part in pre arranged face-to-face meetings to discuss international technology and knowledge cooperation

This unique opportunity is open to organisations from all life sciences sectors. If you are seeking to out-license technology, are interested in new R&D or technical co-operation(s), would like to source new products, services or suppliers then the IRC Scotland partnering event is not to be missed.

The IRC partnering event will take place on:

**15th June 2006** and will be free of charge

The BioDundee International Conference will take place on:

**16th June 2006** fee attached

The IRC Partnering event offers participants a platform to profile their expertise, technologies and products and to meet international providers of technologies or those with in-licensing needs, with a view to striking immediate or future collaborations – all in one location!

Now in its sixth year, the BioDundee International Conference continually attracts over 200 delegates from the local, national and international life sciences scene. This year's conference will look at growing life sciences companies into successful businesses and the activities which are associated with this. The conference will host a panel of international speakers - all renowned experts in their specific fields, such as Michael Cassidy from Georgia Research Alliance, and Nigel Atherton from the Prostrakan Group. A Life Science Golf Day in St Andrews will also once again take place after the conference.

You can register for the IRC Partnering Event at

[http://  
biodundee.ircnet.lu](http://biodundee.ircnet.lu)

however registration for the conference is separate at <http://www.biodundee.co.uk>

Companies do not need to register for the conference to participate in the partnering event; however participants will find both events to be complementary.

To find out more or register for the partnering visit: <http://biodundee.ircnet.lu>
